

Training course TRIZ for Entrepreneurs

“TRIZ for Entrepreneurs” was an international training focused on development of youth workers’ competences in entrepreneurship support with help of a creative problem-solving theory called TRIZ.

The training took place in Samsun, Turkey (14th – 22nd August 2017) and there were 26 young people from 8 countries present including 3 Czech youth workers from EDUcentrum.

The training offered us an opportunity to meet TRIZ experts (both academicians as well as practitioners), to reflect on our ideas on development of social businesses and mutually share our experience and opinions.

The EDUcentrum team intends to use new experience in upcoming project activities to enhance our trainings and incorporate innovative ideas and solutions.
